

INSTALLATION TIPS

LX TUBE CLAMPS

Tools required:

6mm allen wrench – 3mm allen wrench

Clamps offered in 4 diameters:

LXC125 – 1.25”

LXC150 – 1.5”

LXC175 – 1.75”

LXC200 – 2”

When installing the LX Tube clamps:

1. Locate mount adapters inside light bar box.
2. Remove half-round retainer which holds mounting bolt, this is the only piece utilized for this installment.
3. Locate Allen bolt and nut in clamp package.
4. Locate nut inside of clamp package, install into bottom of half-round retainer then slide into track located on the bottom of the LX LED bar.
5. Locate mating half of clamp (the side with thru hole). Utilizing allen head mounting bolt located in the CLAMP package, install washer/lock washer with bolt. With 6mm allen wrench, screw into moon shaped piece, leaving finger tight.
6. Position on the vehicle, once clamp is squared up, remove bar & tighten down bolt inside of the clamp (red Loctite recommended). Put light back on vehicle then install second half of clamp, utilizing 3mm allen wrench, install 4 small Allen screws, adjust accordingly, and tighten down.
